-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This Official Action is in response to applicants response filed 9/05/06. The delay in the mailing of this Official Action is regretted. Any rejection of record of the previous official action not repeated below are withdrawn. The examiner indicates that the rejections of record are withdrawn in view of applicant amendments and arguments filed 9/05/06. All rejection of record have been withdrawn, however, see new ground of rejection set forth below.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 81, 93, 106, and 176-243 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific asserted utility or a well established utility.

The claimed invention does not have a specific utility. The claimed invention is drawn to double stranded RNA with specified size ranges and with specified chemical modifications. The claimed invention is disclosed to act as a substrate for RNase III, however, any double stranded RNA would act as a substrate for RNase III and the claimed invention therefore lacks a specific utility since the properties of the instantly claimed invention are not different from longer double stranded RNA molecules, for

Art Unit: 1635

example. The instantly claimed subset of double stranded RNAs do not appear to possess any specific properties that would lend to a specific utility other than the utility possessed by longer double stranded RNAs, for example. There is no indication from the specification, as filed, that the instantly claimed double stranded RNAs have any utility other than that shared the entire class of RNase III substrate double stranded RNAs. The instant specification does not appear to provide any disclosure for any specific utility for the RNAs instantly claimed. Since the claimed invention has no specific utility, credibility will not be assessed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R. McGarry whose telephone number is (571) 272-0761. The examiner can normally be reached on M-Th (6:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J. Douglas Schultz can be reached on (571) 272-0763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
